

SOOR AL KUWAIT

Torch applied APP modified bitumen waterproofing membrane
4mm thick reinforced with non-woven polyester mat

DESCRIPTION

Soor Al Kuwait is torch applied membrane manufactured from APP modified distilled bitumen, reinforced with a non-woven spunbonded polyester fabric, rot-proof and flexible. The polyester gives the membrane its excellent mechanical properties, allows for high tensile, elongation and tear strength. The chemical resistance of SOOR Al Kuwait makes it suitable for tanking applications where aggressive ground water conditions dominate.

ADVANTAGES

- Positive barrier to water ingress and dampness
- Excellent resistance to aging and weathering
- Flexibility at low temperatures
- Stability at high temperatures
- High tensile strength and tear resistance
- Accommodates structural movements
- Fast, easy and clean application

SPECIFICATION

SOOR Al Kuwait waterproofing membrane complies with the requirements of ASTM D 6222 type II, Grade S, UEAtc MOAT 30, DIN 52133 International Standards.

Certificates

The Manufacturing facility is certified with the ISO 9001:2015 QMS, GMP, ISO 14001 EM and ISO 45001 OH & S.

USES

To avoid damp and water leakage risk, it's recommended for:

- Concrete roof and floor slabs
- Basements
- Foundations
- Swimming Pools
- Fountains
- Drain Gutters
- Bathrooms
- Reservoirs
- Bridges
- Tunnels
- Sub-grade structures
- Car Park Deck Slabs

THICKNESS

We produce different thicknesses (3, 4, 5 mm) are available upon request.

INSTRUCTION TO USE

SURFACE CLEANING

All surfaces should be smooth, clean and dry. To make sure it is cleaned from nails, grease, dust, debris, oil, protruding elements etc.

PRIMING

Apply one coat of primer and we recommend using Bituprimer. Allow the primer coat to dry until it is tack free. Prior to the application of the membrane, all surfaces must be re-primed if left for more than 24 hours.

APPLICATION

The membrane is unrolled and placed in the correct position. Each roll must side overlap at least 10 cm, while slowly unrolling the membrane the surface is lightly heated by means of a propane gas torch causing surface melting and subsequent adhesion to the surface. End joints should be made with a minimum of 15 cm overlap.

APPLICATION TOOLS AND EQUIPMENT

- Propane gas torch with related gas cylinder
- Knife/cutter
- Trowel with a rounded tip
- Marking Aids
- Measuring Tape
- Fire Extinguisher

HEALTH, SAFETY AND ENVIRONMENT

All safety measures should be observed during application. Fire extinguishers should be available on site. Care should be taken with gas, and torches should not be rested on finished surface or on any materials that can be scratched by flame or hot torch. Gloves and goggles should be worn by all workers during application.

Read, understand and follow all Material Safety Data Sheets and product label information for this product prior to use.

STORAGE

- Keep the products packed in a dry place.
- Keepaway from direct sunlight.
- Do not place the pallets on top of each other.
- Rolls must always be kept in a vertical position.
